Universal data access using **ORACLE**[®]

From a single point in your network you can access all of your enterprise data.

Disparate file access is completely transparent to your applications.

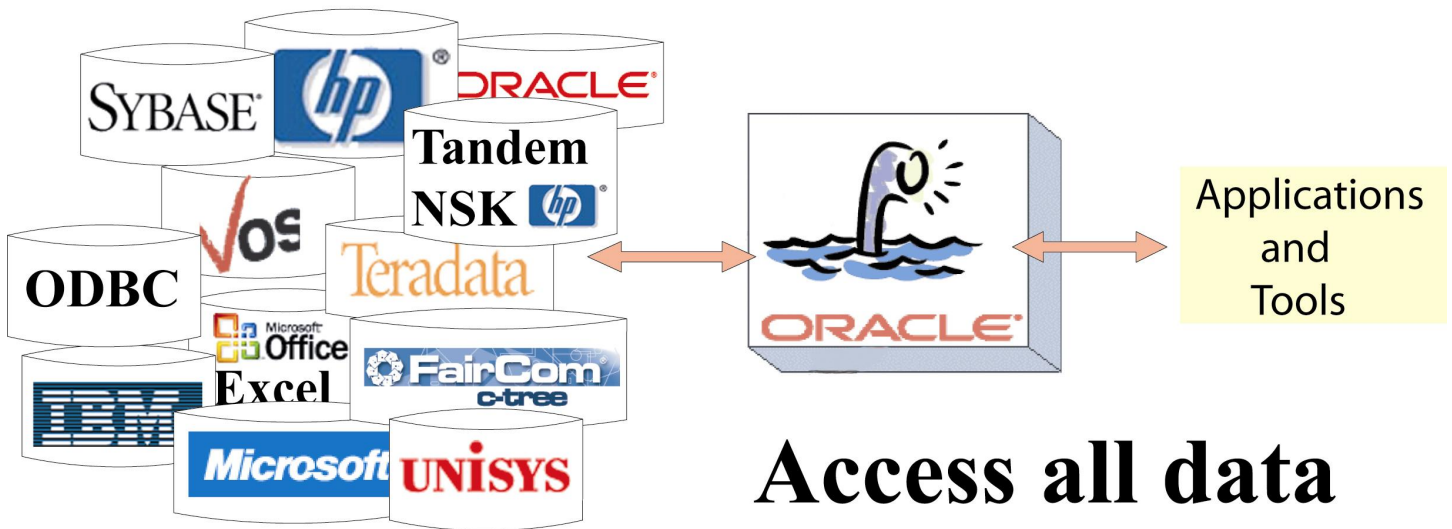

Periscope is JAVA based so it's totally portable. It runs under Oracle 8i thru 10g, wherever Oracle will run.

Periscope requires no application modifications. It installs pretty quickly with the assistance of WhiteCap's "fast start" team.

Periscope Solves:

- **Real-time Data Access**
- **Database Conversion & Migration**
- **Systems Integration**
- **Data Backup**

Simplify your data access

Access all data from Oracle
